October 2017

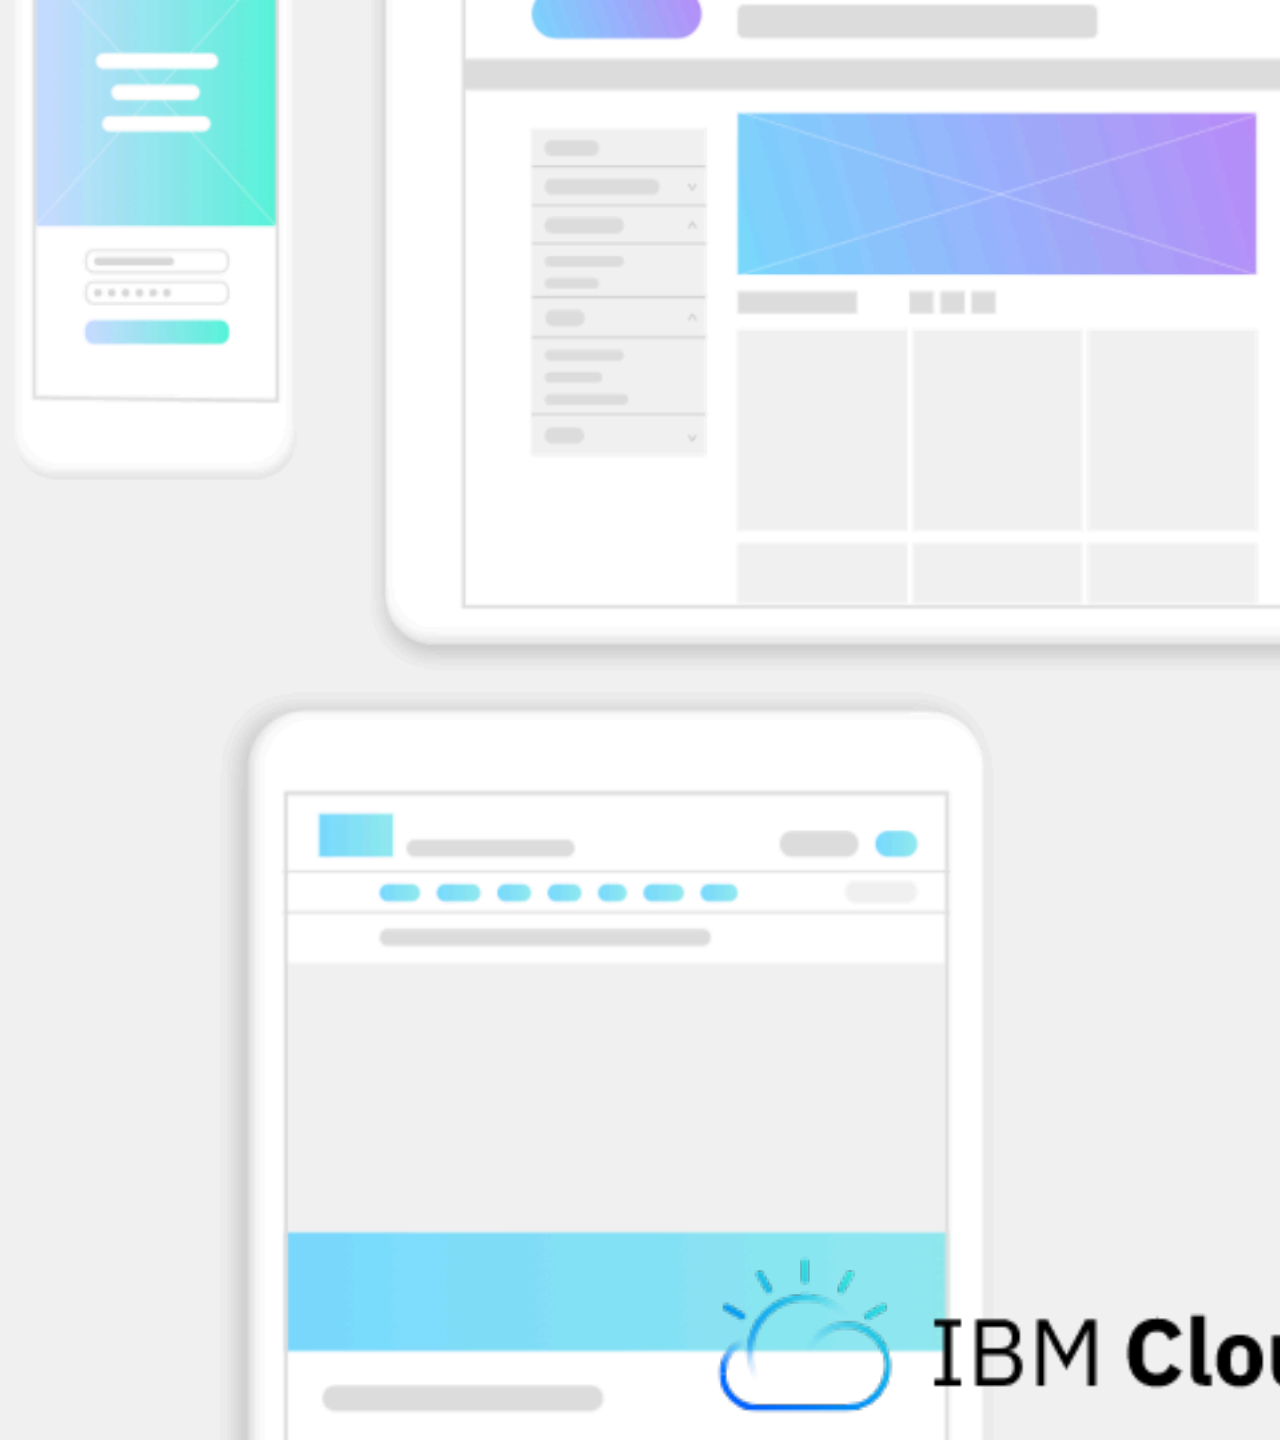

The real value of data is being able to **extract meaningful insight**, to make **more informed** decisions, and to create **differentiating, predictive** business models.

# Build on the cognitive platform for business

IBM Cloud enables you to integrate  
powerful analytics and AI into your  
applications.

**IBM Cloud**

# Demo Scenario – Building a Predictive Chatbot

- Fitness Club USA is a national gym chain
- They want to get their members to sign up for more fitness classes (cross-sell opportunity) by offerings personalized recommendations
- They want to enhance customer experience by providing a personalized interface for customers across multiple channels of interaction

Fitness Club USA's new  
**cognitive** website...

Hello, I'm your Cognitive Fitness Buddy! I can help pick out the best fitness class for you. Would you like to get started?

Yep!

Great. Let's get started. What fitness goal are you looking to achieve?

I want to lose weight.

Shedding some pounds is a fantastic goal! Enter your phone number and I'll make a personalized recommendation.

415 308 1103

Hello Sam Ennis! Shall I score a Machine Learning model to provide you with a fitness class recommendation?

ok

Here's a fitness class that could be a great fit for you. I can get you started with a 20% off coupon. Would you like to sign up?

### Zumba

yes

Awesome. I've signed you up. See you at the first class!

Type something

# IBM Cloud Services used to build **Fitness Club USA's** app

## Data Science Experience

- Create ML models using a variety of tools and frameworks (Python, Spark, SPSS)
- Deploy ML models to RESTful endpoint for scoring
- Continuous monitoring and feedback of ML models in production

## Watson Machine Learning

HTTP  
(REST)

Flow-based programming  
on Node.js runtime

## Node-RED

HTTP  
(REST)

## Cloudant

## Watson Conversation

- API to build a chat bot from the ground up to be used across multiple channels
- Understands natural-language and responds to customers in human-like conversation
- Integrated dialog builder to easily construct dialog flows

# Autodesk Inc.

Speeding customer response times by 99 percent with IBM Watson

Using the IBM® Watson™ Conversation service, Autodesk developed a virtual agent that interacts with customers. The solution returns answers quickly by applying natural language processing (NLP) and deep learning techniques to recognize and extract the intent, context and meaning behind inquiries.
